Michael Bell has worked for The Nature Conservancy for nearly 18 years and currently holds the position of Protection Strategy Director. He is also Point Conception Institute Business Development Director at The Jack and Laura Dangermond Preserve, a role he assumed following his extensive involvement in the site’s acquisition when The Nature Conservancy purchased the nearly 25,000-acre Bixby Ranch along the coast at Point Conception in December 2017. With his nearly six years as the Dangermond Preserve’s Director, he will have much to share about the challenges and successes of the ongoing management of this very important natural resource.

There is no charge for this event but donations are encouraged.
